What did you like most about this instructor's teaching methods?

1. Prof. Yunus is such a quality professor. She is so knowledgeable but it is her ability to TEACH the subject matter that makes her so invaluable to this school. Finance can be overwhelming and sometimes quite difficult to understand but Prof. Yunus makes it so easy by not only providing supplementary course material to further explain the concepts, but she explains it in such a way that it is easy to understand. Always prepared and fields any and all questions. She is very open and allows students to feel comfortable when asking questions or seeing her during office hours. She really cares about her students and wants them to do well - it shows.
2. What was most helpful was her concern of each and everyone of her students success in passing her class. She prepared great lecture notes for her students that was more helpful than the required text for the course. Dr. Yunus is a wonderful and caring hands on professor that goes beyond the call of duty when it comes to the hours that she extend to her students that are struggling with the subject material. I've never had a professor before that utilizes so much of her own time that is taken away from her family to ensure that her students who are in need of that extra one on one attention get what they need. Dr. Yunus is the best!!!!
3. Professor Yunus is an excellent professor. She provided great lecture notes, practices quizzes, sample exam questions, and conducted her lectures in a fun and engaging way. She went above and beyond to make herself available to her students and was highly communicative about

her availability and interest in helping any student who wanted assistance. She had grades ready in a very timely fashion, sometimes even having them available on the same day. Her exams were challenging, but not so excruciatingly difficult as to discourage the students' from trying in the future. She brings a unique humor and sense of lightness to the classroom, while still managing to maintain control of the class, which is refreshing. I have already recommended her to several of my friends who need to take this course, as I truly believe she's a fantastic professor, who genuinely cares about her students, the material, and this school.

4. Dr. Nafeesa Yunus provided very effective content-specific course materials (Non-textbook resource/Developed by Dr. Yunus), and supplemented the resources with structured chapter overviews, concept application, and also by providing critical problem-set examples. These learning materials enabled me to focus on chapter-specific core challenges, and then proceed to the development and application of effective problem solving strategies. Her pedagogical methodology provided me with a natural segue to acquiring a clear, concise, and thorough understanding of the collective concepts. Her innate knowledge of the student academic experience afforded her a unique perspective which she has effectively leveraged for the benefit of her Fin. 471 students. Her strength as a professor is her ability to simplify the complex, and provide students with an effective and insightful learning experience.
5. She shows interest in every student and cares that everyone learns the material, she has a great teaching style and is available if needed for extra assistance. If all my professors were like her, it would be perfect.
6. A great person. She cares about the students and wants everyone to do well. She will bend over backwards to help students after class and extend office hours to accommodate those who are having difficulties. She makes it known to the students to always ask for help and does not shun those who ask 'stupid' questions. I appreciate what she does as a teacher and wish her the best.

explanation of difficult concepts. She was my best teacher this semester and in my university experience!
